

Version 13 Enhancements

eFax

This exclusive feature Instantly send and receive electronic faxes using the Digital Communication Suite. This feature eliminates paper and the hassle of traditional fax machines. The eFax feature is connected to the patient record and saves a copy of the fax in the patient notes. The Fax in box will display senders name, the subject and time sent, similar to e-mail.

Online Patient registration & Appointment Request!

This highly requested feature will save time for both you and your patients. It will eliminate paperwork and cut down patient traffic at the front desk. You won't have to play phone tag with your patients when it comes time to set up an appointment. All that's left is verifying insurance, which can also be done before the patient arrives!

eReminders *Set it & Forget it!*

eReminders are now completely automated, so you can tend to your patients. Just another great enhancement to reduce your workload!

Faster Lookup List with new icons

Perio Chart Voice Activation

Windows based SAPI Voice Command feature is now built into the Chart!

New Birthday Greeting and eReminder designs

ToDo List now includes Birthday List

LabLink column in Appointment Monitor

Appointment Monitor now contains an additional column that will display a "crown" icon, to indicate case location status. The "crown" Icon will be **Red** for "**Sent**", **Orange** for "**Coming Back**", **Green** for "**Case is in Office**". From the transaction screen, put in treatment and choose LabLink icon. Your lab prescription will automatically show your transaction treatment for lab case.

(Power Sort) Analysis Breakdown *See where your money is being made!*

With a click of a button, get detailed breakdowns of anything you generate in the power sort report. Sort by name, percentage, counts, fees, totals, location and more. Easily see what services are most popular and profitable, and which providers generate the highest revenue in your office! This new feature integrates with your Business Analysis Report.

Secured Data Accessing

Open architecture interface will allow you to grant access to any third party company that you're currently working with. It is safe, secure, and you will have total control.
